Making Green Second Nature

Solutions for California

Liz Belenis Slater

"Each of us has a part to play in a new future that will benefit all of us. As we recover from this recession, the transition to clean energy has the potential to grow our economy and create millions of jobs -- but only if we accelerate that transition. Only if we seize the moment. And only if we rally together and act as one nation -- workers and entrepreneurs; scientists and citizens; the public and private sectors."

-President Obama, June 15, 2010
