

Green Information Technology Pavilion

Sponsored by

i n v e n t

1. Workplace Design and Infrastructure – Sponsors: GreenIT and Tate Access Floors

Green Benefits: Reduced building space, reduced building infrastructure, efficient electrical supply and usage, reduced IT infrastructure, reduced IT equipment, reduced amount of copper cable (PVC's and copper), less toxic cable materials (lead-free), recyclable cable materials, reduced cable waste (re-use), longer lifetime for wired infrastructure

2. Desktop and Portable Computers – Sponsors: HP Personal Systems Group (Commercial and Public Sector), Verdiem, and VIA Technologies, Inc.

Green Benefits: Reduced electricity consumption (lower-power processors, efficient power supplies, power management software), product life-cycle design for re-use and recycling, reduction of hazardous substances in manufacturing processes and in products, reduction of packaging waste, green product certifications (Energy Star, EPEAT)

3. Printing and Electronic Document Management – Sponsors: HP Imaging and Printing Group and Public Sector Office Supplies, Captaris

Green Benefits: Reduced paper use, reduced solid and hazardous waste streams, reduced electricity consumption, product life-cycle design for re-use and recycling, reduction of hazardous substances in manufacturing processes and in products, green product certifications

4. Converged Networks – Sponsors: ATI Inc. and ShoreTel

Green Benefits: Reduced cable and network infrastructure, reduced electricity consumption, reduced volume of equipment with associated reduction in space and cooling requirements, tele-work enabling reduced travel, integration with building management systems

5. Data Center and Network Computers – Sponsors: HP Industry Standard Servers and Consolidated Client Infrastructure Groups, Bell Products, California Data Center Design Group, Server Technology, VIA Technologies, Inc.

Green Benefits: Reduced electricity consumption, reduced volume of equipment with associated reduction in space and cooling requirements, increased product lifetime, reduction of hazardous substances in manufacturing processes and in products, green product certifications

6. Product Design and End-of-Life Management – Sponsors: HP Recycling and Environmental Programs

Green Benefits: Elimination of toxic materials from products and manufacturing processes, diversion of toxic materials from landfill, responsible recycling of electronic goods
