A Market Like No Other

K-12 SCHOOLS:

- **Number of Schools:** California has over 10,000 public schools, which include elementary, middle, and high schools.
- **Funding and Budgets:** The state allocates billions annually for school construction and modernization. For instance, in 2020, California passed Proposition 13, which allocated \$15 billion for school construction and modernization.
- **Ongoing Projects:** The ongoing need for new schools, upgrades, and maintenance of existing facilities drives a continuous demand for construction services.

HIGHER EDUCATION:

- **Universities and Colleges:** California is home to 10 University of California (UC) campuses, 23 California State University (CSU) campuses, and 116 community colleges.
- **Capital Projects:** The UC and CSU systems regularly invest in capital projects. For instance, the UC system alone has a capital improvement program budget that exceeds \$1 billion annually.
- **Private Institutions:** Numerous private colleges and universities also contribute to the market size, with significant investments in new buildings and campus improvements.

How Big is the Market?

WHO ATTENDS?

The Summit attracts professionals from both public and private sectors—decision makers regarding green programs and facilities development.

Victor Gordo, Mayor of Pasadena

Steve Zimmer, Deputy Superintendent of Public Instructions
